DIVIDEND

Your Directors are pleased to recommend a dividend of ₹ 3/- per Equity Share of ₹ 10/- each (i.e. 30%) on the Equity Share Capital of ₹ 3.60 crores for the financial year ended 31st March 2016. The Dividend outgo will be ₹ 1.30 crores (inclusive of dividend tax of ₹ 0.22 crores).

OPERATIONS

During the year ended 31st March 2016, the Company achieved a turnover of ₹ 190.20 crores. EBIDTA of the Company during the year was ₹ 24.15 crores and Profit before Tax was ₹ 9.08 crores.

Operations of the Company were negatively impacted due to two years of continuous failed monsoons leading to failure of four crop cycles. Not only has this led to hardships for the farmer but also has substantially reduced his affordability and cash flow. On top of it, regulatory uncertainty added to the challenges faced in the year gone by. Combination of all these led to a slow-down in the industry and slow recovery of

payments from the farmers. Hopefully, the expected good monsoon this year will help companies involved in the Agri economy as well as the farming community.

RESEARCH AND DEVELOPMENT

Over the years R&D spend of the Company has been significant. During the year 2015-16 around 7% of its turnover was invested in R&D activities. The Company has developed and markets a number of its own hybrids across the crops of Cotton, Corn, Paddy, Sunflower, Bajra, Jowar etc. Over the last few years the vegetable breeding programme has also produced leading hybrids in the areas of Okra, Tomato and Chillies amongst others.

With this portfolio of products, the Company has been able to access new market segments across the country. Apart from being an important player in cereal and cash crops, the Company is emerging as a strong player in the field of vegetables with some leading hybrids in Okra and Tomato having significant market shares in various regions of India and neighbouring countries.

The Company continues to focus on its research programme as its backbone for growth. In order to speed up the product development cycle and stay ahead of competition, your Company is using advanced techniques like Double Haploid, Embryo Rescue, DNA based methods etc. Farmers' growing expectations towards disease and pest tolerance has created new avenues in Vegetable Hybrid development, where desired characters are being successfully transferred from wild species into new hybrids.

To build a continuous pipe-line of products, a dedicated team of scientists at different locations are working on more than 100 hybrids that have new improved attributes which are in different stages of evaluation right from Multi-location testing to minikit trials and demonstration plots.

INDUSTRY OVERVIEW

The poor monsoons over the last two years during Kharif coupled with unseasonal rains in the Rabi season has created havoc in the agricultural economy

leading to dwindling productivity and large crop losses. The deficit monsoon during the year gone by has compounded the problems of the farming community, who were already reeling under the pressures of the previous bad monsoons. Since a large part of Indian agriculture is still rain-dependent, water scarcity has a significant impact on the crop output in these areas. Two years of back to back rain fall deficit coupled with lower subsidies and relatively non-remunerative prices for their produce has put financial pressure on the farmers. The skewed crop patterns and absence of advanced agronomy practices have added to the problems of the farmers in States like Haryana, Punjab, Eastern Uttar Pradesh, etc. where they continue to grow water intensive crops.

Also during the year, pests like White Fly in Punjab and Pink Bollworm in Gujarat caused extensive damage to the cotton crops in these states, resulting in significant losses to the farmers. This along with lack of farm credit has resulted in trying times for the farmers and has reduced their overall affordability. During the year the Government also regulated the Cotton seed pricing by fixing the maximum sales price.

Given the growing population in India, the Indian Government understands the significance of these challenges and its impact on food security. Keeping this in mind, the Government has started a number of schemes to help the farmers, some of the significant ones being:

- Soil Health Card
- Pradhan Mantri Fasal Bima Yojana
- Rashtriya Krishi Vikas Yojana
- Pradhan Mantri Krishi Sinchai Yojana
- National Agricultural Market

The intent to move subsidies for input and food grain into direct cash transfer mechanism is also under consideration, which should help plug subsidy leakages and ensure greater availability of funds in the hands of the farmer as well as for strategic public investments in the areas of irrigation, grain storage systems and cold storages. Government's initiative of crop insurance will also go a long way in providing stability to the farming community.

All these initiatives augur well for the industry in the long run.

OPPORTUNITIES, THREATS, RISK AND CONCERNS

Opportunities

The global population currently stands at 7.2 billion, and is expected to rise to 9.3 billion by 2050. This will lead to an increased demand for food. Increasing demand for food along with reducing arable land will put pressure on Nations across the globe to increase their Food productivity, in turn creating a demand for high quality hybrid seeds.

Around 25% of the global crop output is lost due to attacks by pests, weeds and diseases, causing stress for the farming community. This offers an opportunity for improved technologies, both GM and non-GM to face these challenges. Global water shortage is also pushing companies to develop new technologies for crops to consume less water in the fields.

The opportunities in the agricultural sector are still under exploited. There are immense opportunities for improving all-round technologies in the entire supply chain right from field to plate. High quality seeds with improved productivity as well as pest resistance capabilities continue to offer good potential. In fact, seeds with the ability to perform under various abiotic stresses are the need of the hour to improve the health of the agricultural sector in India. Mechanisation and improved farming techniques including crop protection technologies would help this sector grow. The Government's increasing budget allocation for the agricultural sector augurs well for the industry. There are new growth opportunities for Indian seed companies to explore markets in the Africa's and Asia's that have agro-climatic conditions akin to India. The growing Indian population and increasing per capita income will need doubling of our food production over the next decade. Hence, the industry is at an interesting crossroad, which has its own set of challenges but also great opportunities ahead.

Threats, Risk and Concerns

High reliance on rainfall for irrigation in India, frequent intervention by the Government both at State and Central levels, increasing weather variability and depressed commodity prices globally, overall economic conditions, ever increasing cost of manpower, unavailability of skilled labour, lack of liquidity in the hands of farmer, withdrawal of government led subsidy schemes, continue to pose challenge to the entire Agriculture Sector including seed industry.

Even the supply of unprocessed seeds, our basic raw material is also subject to production risk due to its heavy dependence on climatic conditions. Failure to get the raw material owing to bad monsoon may impact our sale and market share. Better and timely production planning, focus on geographical diversity for production has enabled the Company to minimize the production related risk.

Rising competition intensity, rapid introduction of superior Hybrids, shifting crop by the farmer to the alternative crops exposes the company to market volatility and risk.

Your Company has been trying to mitigate its market and weather related risk by diversifying into large number of crops, which can be sold both in Kharif and Rabi season.

HUMAN RESOURCE DEVELOPMENT

Apart from R&D, the other important pillar is the people in your Company. Your Company has been focussing in improving the quality of talent by hiring people from good management institutes as well as by conducting focussed Management Development Programmes by senior faculties in both the areas of Management and Technical Skills. The Company is also strengthening employee involvement through communication meetings, cross functional teams, Young Leader Forums, Suggestion Schemes, etc. Members of the team also create a sense of community by involving them in various CSR activities of the Company. In the mission of creating sustainability and building a strong agile culture, the Company participates in employee surveys conducted by external agencies and also benchmarks itself with other competitors and best work places. The Company continues to endeavour to offer a motivating but challenging work environment where performance is recognised and employees are motivated to realise their full potential.

INTERNAL FINANCIAL CONTROLS

The Company has in place adequate internal financial controls with reference to financial statements and no material reportable weakness was observed in the system. Further, the Company has in place adequate internal financial controls commensurate with the size and nature of its operations.

The Company also has robust Budgetary Control System and Management Information System (MIS)

We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards

and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls Over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2016, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.
